

# CESSNA 170

## MICRO Vortex Generator Kit

The **MICRO Vortex Generators** for the Cessna 170 (Rag Wing) are now FAA STC approved and ready for installation on your airplane. This jet age technology provides an 10% reduction in stall speed, improved aileron response, reduced landing and takeoff roll.

*The FAA Test Pilot says, "It just flies better with VGs and the difference is -- when I tell the airplane what to do, it follows my instructions better."*

*This is what we call:*

***"Improved controllability at slow speeds"***

The **Micro VG Kit** consists of 76 Vortex Generators mounted on the wings, just aft of the leading edge and 36 Vortex Generators mounted on the underside of the horizontal stabilizer. Included are the STC, installation tools, detailed drawings and instructions, templates for positioning VGs, spares, Loctite AA 330 adhesive and all the materials needed for the easy one day installation.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade 6063-T6 aluminum, alodined to a mil-spec, ready for painting. The bottom of the VGs are curved to fit the contour of the wing surfaces and flat to fit the horizontal stabilizer surfaces.

When placing your order for a **Micro VG Kit**, please provide the Serial Number and Registration Number. We can ship the same day if your kit is ordered Alodined. An option for pre-painted VGs is available for an additional charge. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

- **Reduced STALL SPEED 10%**
- **Improved Characteristics**
- **Improved Controllability**
- **Improved Crosswind Control**
- **FAA STC Approved**
- **Easy One Day Installation**
- **Complete Kit**
- **Kit Price \$1025 plus S&H**
