Maximum zero fuel weight	6515 lbs	6750 lbs	235 lbs

About MICRO Vortex Generators

The **MICRO Vortex Generators** for the Cessna 402C are now FAA STC approved and ready for installation on your airplane. This jet age technology provides virtual elimination of V_{mc} , a dramatic improvement in characteristics, reduced stall speeds, reduced accelerate/stop distance, and improved safety. You also get a 360 pound Gross Weight Increase.

The **Micro VG Kit** consists of 118 vortex generators mounted on the wings, just aft of the boot line and on both sides of the vertical stabilizer, plus four strakes (similar to the strakes which Cessna puts on the 303 Crusader) on the inside and outside of the engine nacelles. Included are the STC, an FAA approved Pilot's Operating Handbook Supplement, installation tools, detailed drawings and instructions, templates for positioning VGs, spares, Loctite AA 330 adhesive and all the materials needed for the easy one day installation.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade 6063-T6 aluminum, alodined to a mil-spec, ready for painting.

As one twin Cessna owner said, "The **Micro VGs** do everything you said they would do and more -- the tail of my airplane thinks it's four feet taller and the rudder thinks it's two feet longer!"

When placing your order for a **Micro VG Kit**, please provide the Serial Number and Registration Number. We can ship the same day if your kit is ordered Alodined. An option for pre-painted VGs is available for an additional charge. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

• **360 lb Gross Weight Increase**

• **Reduced V_{mc} , V_s , V_{so}**

• **FAA Certified Numbers**

• **Easy One Day Installation**

• **Improved Characteristics**

• **Kit Price \$3245 plus S&H**
