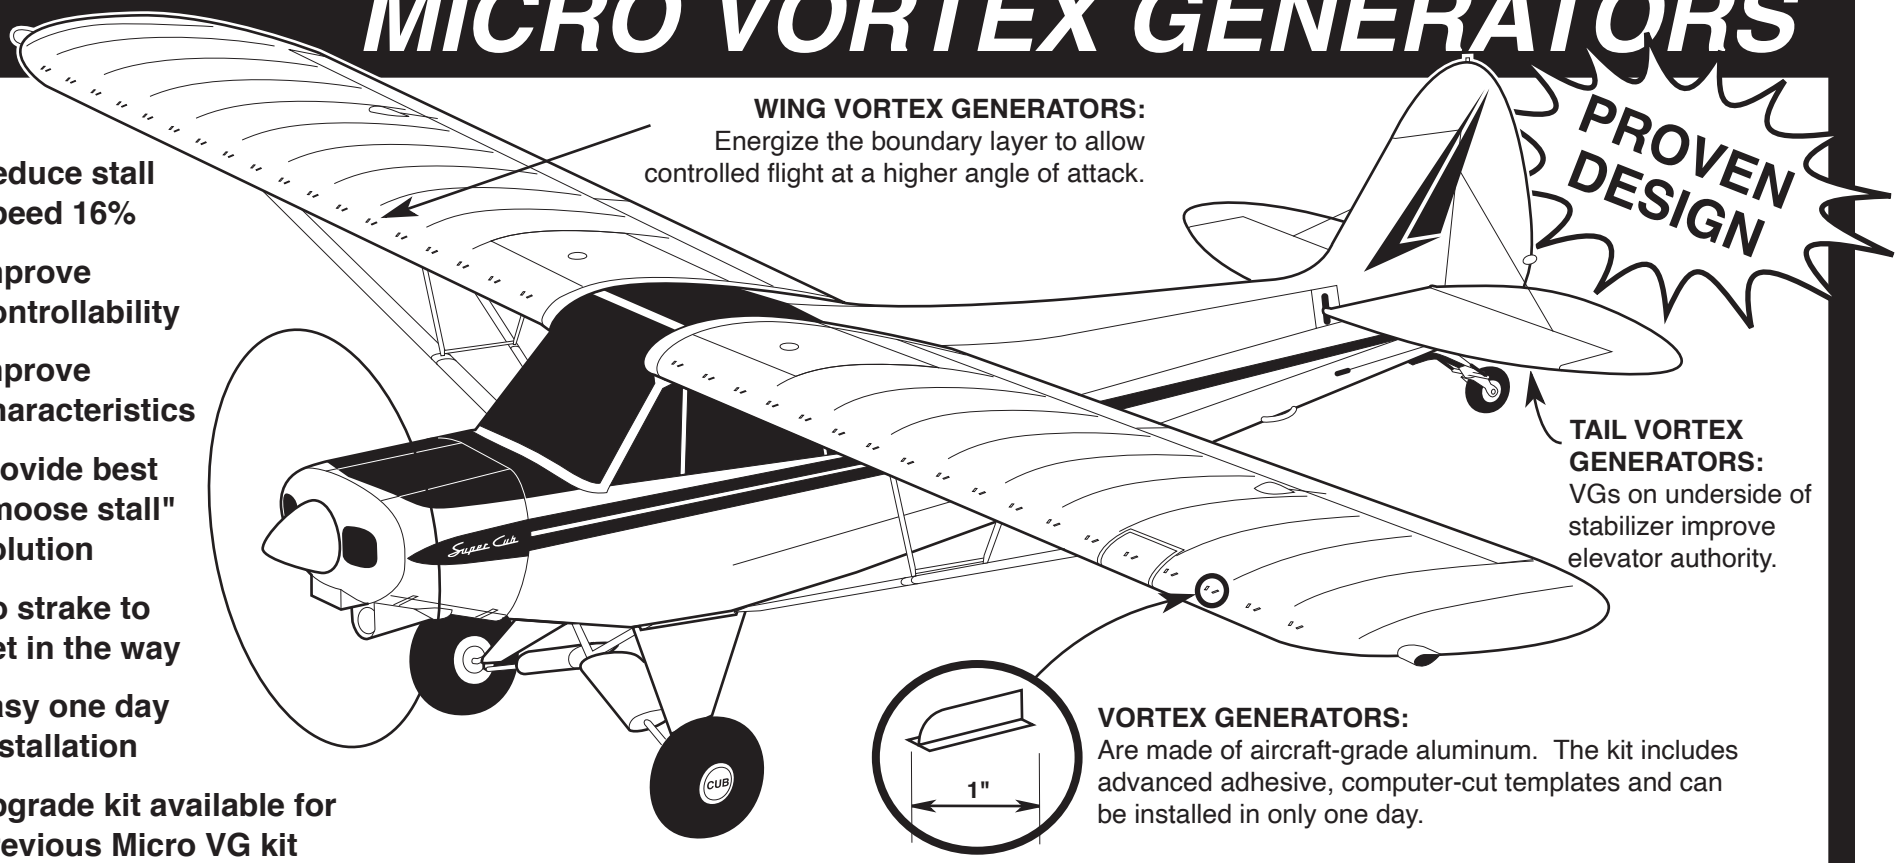
IMPROVED SUPER CUB
MICRO VORTEX GENERATORS

- **Reduce stall speed 16%**
- **Improve controllability**
- **Improve characteristics**
- **Provide best "moose stall" solution**
- **No strake to get in the way**
- **Easy one day installation**
- **Upgrade kit available for previous Micro VG kit**



WING VORTEX GENERATORS:
Energize the boundary layer to allow controlled flight at a higher angle of attack.

PROVEN DESIGN

TAIL VORTEX GENERATORS:
VGs on underside of stabilizer improve elevator authority.

VORTEX GENERATORS:
Are made of aircraft-grade aluminum. The kit includes advanced adhesive, computer-cut templates and can be installed in only one day.

FEATURES:

1. **Tail VGs on bottom of stabilizer provide full-span elevator authority and improve controllability.**
2. **Wing VGs forward of fuel cells provide full-span airflow attachment.**

CUB KIT PRICE:
$750
