V_{mc}	Reduced 6 mph
V_s	Reduced 6 mph
V_{so}	Reduced 5 mph

About MICRO Vortex Generators:

The **MICRO Vortex Generators** for the Piper Geronimo are now FAA STC approved and ready for installation on your airplane. This jet age technology provides reduced V_{mc}, a dramatic improvement in characteristics, reduced stall speeds, and improved safety.

The **Micro VG Kit** consists of 66 vortex generators mounted on the wings, just aft of the boot line, 32 vortex generators mounted on the vertical stabilizer and 60 vortex generators mounted on the underside of the horizontal stabilizer. Included are the STC, detailed drawings and instructions, templates for positioning VGs, spares, Loctite AA 330 adhesive and all the materials needed for the easy one day installation.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade 6063-T6 aluminum, alodined to a mil-spec, ready for painting.

As one twin owner said, "The **Micro VGs** do everything you said they would do and more -- the tail of my airplane thinks it's four feet taller and the rudder thinks it's two feet longer!"

When placing your order for a **Micro VG Kit**, please provide the Serial Number and Registration Number. We can ship the same day if your kit is ordered Alodined. An option for pre-painted VGs is available for an additional charge. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

- Reduced V_{mc}, V_s, V_{so}
- FAA STC Approved
- Easy One Day Installation
- Improved Characteristics
- Improved Lateral Stability
- Improved Elevator Control
- Kit Price \$2145 plus S&H
