

# TAYLORCRAFT

## MICRO Vortex Generator Kit

**Reduced Stall Speed 5 MPH!**

### About MICRO VGs

The **MICRO Vortex Generators** for the Taylorcraft are now FAA STC approved and ready for installation on your airplane. This jet age technology provides a 5 MPH reduction in stall speed, improved aileron response, reduced landing and takeoff roll.

The **Micro VG Kit** consists of 80 Vortex Generators mounted on the wings, just aft of the leading edge, and 32 Vortex Generators mounted under the horizontal stabilizer. Included are the STC, installation tools, detailed drawings and instructions, templates for positioning VGs, spares, Loctite AA 330 adhesive and all the materials needed for the easy one day installation.

The **Micro Vortex Generators** are manufactured under our FAA PMA from aircraft grade 6063-T6 aluminum, alodined to a mil-spec, ready for painting. Each VG is curved on the bottom to fit the contour of the wing.

When placing your order for a **Micro VG Kit**, please provide the Serial Number and Registration Number. We can ship the same day if your kit is ordered Alodined. An option for pre-painted VGs is available for an additional charge. Amex, VISA, MasterCard, Discover and COD orders accepted. Please call for further information.

- Improved Aileron Authority
- FAA STC Approved
- Easy One Day Installation
- Improved Characteristics
- Complete Kit
- Kit Price \$750 plus S&H
